1 Mission

To provide, promote, and protect access to reproductive health care and sexuality education so that all people can make voluntary choices about their reproductive and sexual health.

Thanks to our generous supporters, we provided:

\$5.4 million

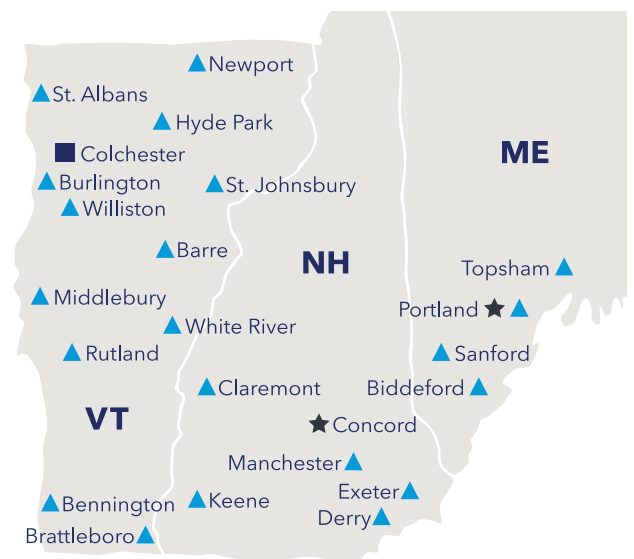

worth of **discounted** and **free** health care to our patients.

At PPNNE, we believe that we all have the right to ...

- high quality health care & the ability to provide it without fear of harassment & violence;
- a voice in decisions that affect our families & our lives;
- knowledge about our bodies & sexual health;
- decide the most basic & fundamental question: whether or not to become a parent;
- make decisions about childbearing free of government intrusion

... regardless of race, gender, sexual orientation, age, income, or zip code.

We have 21 health centers across our region and have a statewide presence across Maine, New Hampshire, and Vermont in outreach, engagement, and advocacy.
